Profile

Software engineering student at the University of Glasgow with hands-on experience building web applications, frontend interfaces, and relational databases using React, Javascript, Typescript, Python, Django, MySQL, HTML/CSS, and Git. Seeking software engineers or frontend development internships/part-time roles to apply problem-solving, teamwork, and development skills in real industry environments.

Education

University of Glasgow
MSci Software Engineering

Glasgow, Scotland
Sep 2024 – May 2029

Relevant Coursework

Algorithms and Data Structures 2, Networks and Operating Systems 2, Web Application Development 2, Object-Oriented Software Engineering, Computer Systems

Experience

Coding Tutor

Freelance

Jan 2022 – Jan 2022

Glasgow, Scotland

- Taught coding fundamentals using Scratch to beginner students, helping simplify technical concepts into engaging and understandable lessons.
- Designed interactive coding exercises and mini-projects to improve student understanding and problem-solving skills.
- Strengthened communication, leadership, and adaptability skills by tailoring explanations to different learning styles.

Cyber Security Workshop Participant

Science Centre

Sep 2023 – Sep 2023

Glasgow, Scotland

- Collaborated in a team-based cybersecurity workshop focused on solving technical and logic-based security challenges under time pressure.
- Analysed clues, communicated potential solutions, and contributed to solving cybersecurity puzzles through teamwork and critical thinking.
- Developed problem-solving and collaboration skills while working in a fast-paced competitive environment.

Projects

DYHTG 2025: GlasLet'sgow | *React, Typescript, Vite, Git*

Oct 2025 – Oct 2025

- Developed the frontend landing page and core user interface using React and Typescript, solving the challenge of presenting event, weather, and AI-generated recommendation data through a clear and intuitive user experience.
- Engineered responsive frontend features for weather insights, personalised event recommendations, event discovery, and chatbot interactions, enabling users to efficiently explore and compare activities across devices.
- Collaborated with backend developers to integrate frontend components with real-time event feeds, weather services, and AI-powered recommendations, contributing to a platform capable of surfacing and displaying 300+ live events daily.
- Presented the final solution to industry professionals and judges, earning an Honorable Mention among 50+ participants and 10+ competing teams at the GUTS DHYTG Hackathon 2025.

Academic Institution Database | *MySQL*

Oct 2024 – Oct 2024

- Designed and normalised a relational database managing students, courses, enrolments and grades.
- Implemented SQL queries, joins and relationships to support efficient data retrieval and reporting..
- Developed a scalable schema that maintained data integrity across multiple interconnected entities.

Recipe Sharing Website | *Django, Python, Javascript, HTML/CSS, Git, Github*

Feb 2026 - Mar 2026

- Developed secure user authentication and account management functionality using Django's authentication framework, solving the need for secure access by implementing registration, login/logout workflows, session management, and personalised user accounts.

- Engineered responsive frontend interfaces and styling using HTML, CSS, Javascript, and Django templates, creating an accessible intuitive user experience for discovering and interacting with recipes.
- Built personalised profile page functionality that enabled authenticated users to manage their accounts, user-specific content, and engage with platform features through a tailored experience.
- Collaborated within a 5-person Agile development team to deliver a full-stack recipe-sharing platform, contributing core authentication and user management features that supported recipe discovery, content sharing, and community engagement.

Technical Skills

Programming Languages: Java, Python, C/C++, MySQL, JavaScript, HTML/CSS, TypeScript

Frameworks: React, Vite, Django

Developer Tools: GitHub, VS Code, Git, REST API Integration

Achievements

GUTS DYHTG 2025 Honorable Mention

GUTS Code Olympics 2026 Top 20 Team

Interests

Drumming, Bass Guitar, Badminton, Game Development, Technology
